

QMS and EMS POLICY

QMS and EMS policy is a program that responds to the current and future needs and expectations of customers in the areas of company activity.

The way how to meet the company's goals is to maintain a quality management system conforming to ČSN EN ISO 9001:2016 standard and environmental management system according to ČSN EN ISO 14000:2016 standard in company **MARPOS s. r. o.**

The **MARPOS s. r. o.** company's management has defined its fundamental orientation to fulfill the requirements and philosophy of integrated management system to the following points:

- 1) **Delivering services to customers in quality standards, the extent and in accordance with its requirements, and by this competently satisfy their needs.**
- 2) **The performance standard is a minimum level of disagreement and claims.**
- 3) **Constant improvement of the achieved quality in processes and activities, and motivation and education of our employees.**
- 4) **Long-term and systematic care of quality will lead to continuous improvement of security functionality and efficiency of management system.**
- 5) **Provide adequate resources (human, material and financial) for the integrated system and to create conditions enabling the support and implementation of this QMS and EMS policy.**
- 6) **Strictly follow all relevant provisions of environmental law and other related laws.**
- 7) **Prevent by training undesirable situations with a negative impact on the quality and the environment.**
- 8) **Actively involve all workers to preventive environmental protection.**
- 9) **Emphasize the environmental aspects in the supplier relations**

QMS and EMS policy is obligatory for all employees of the company.
